Development of Slovenia

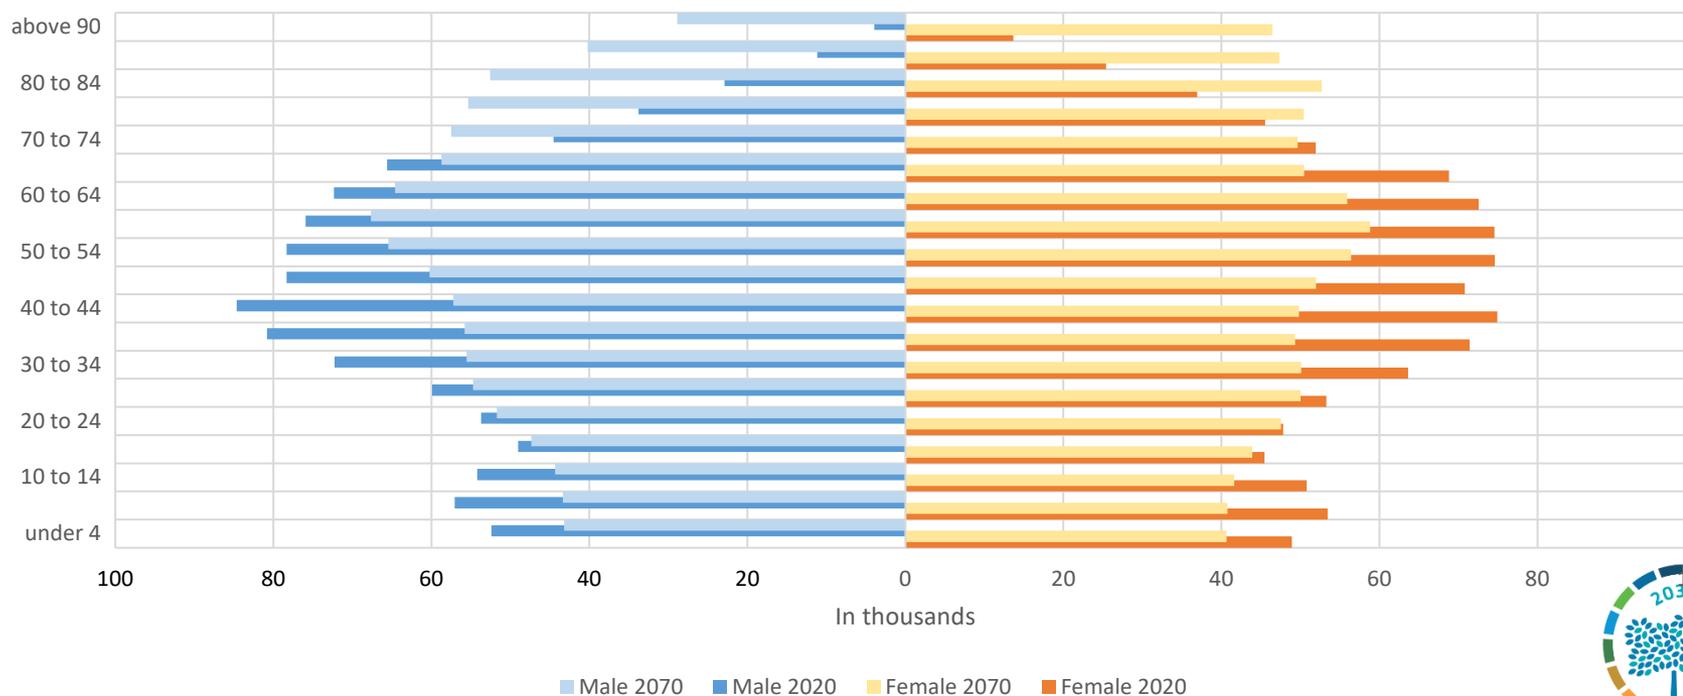

KAKOVOST ŽIVLJENJA ZA VSE

Starting points of development

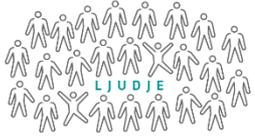

Slovenia is already achieving favorable results in some development areas, but in others it is lagging behind more developed countries. Therefore, in order to further improve the welfare of the population, it is necessary to address in particular:

- low productivity of the Slovenian economy,
- challenges brought on by an aging society.

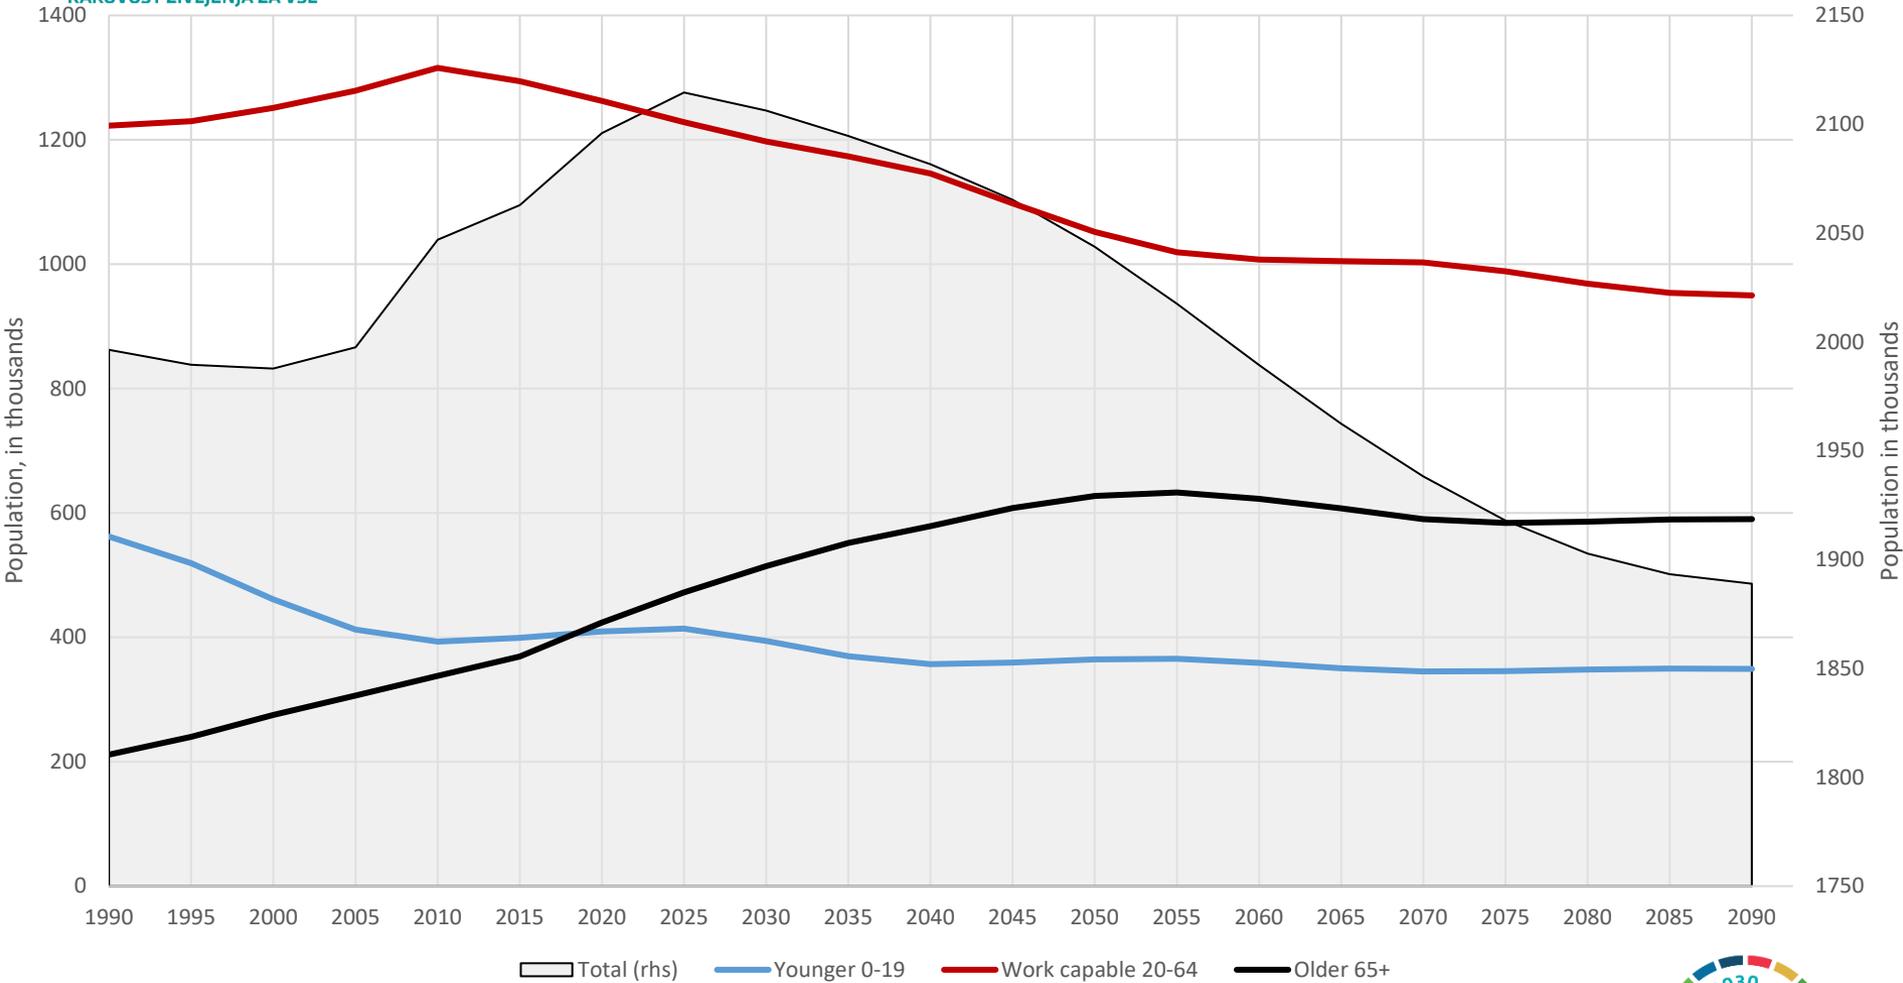

Data source: Eurostat.

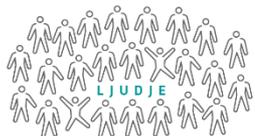

Challenges brought on by an aging society

KAKOVOST ŽIVLJENJA ZA VSE

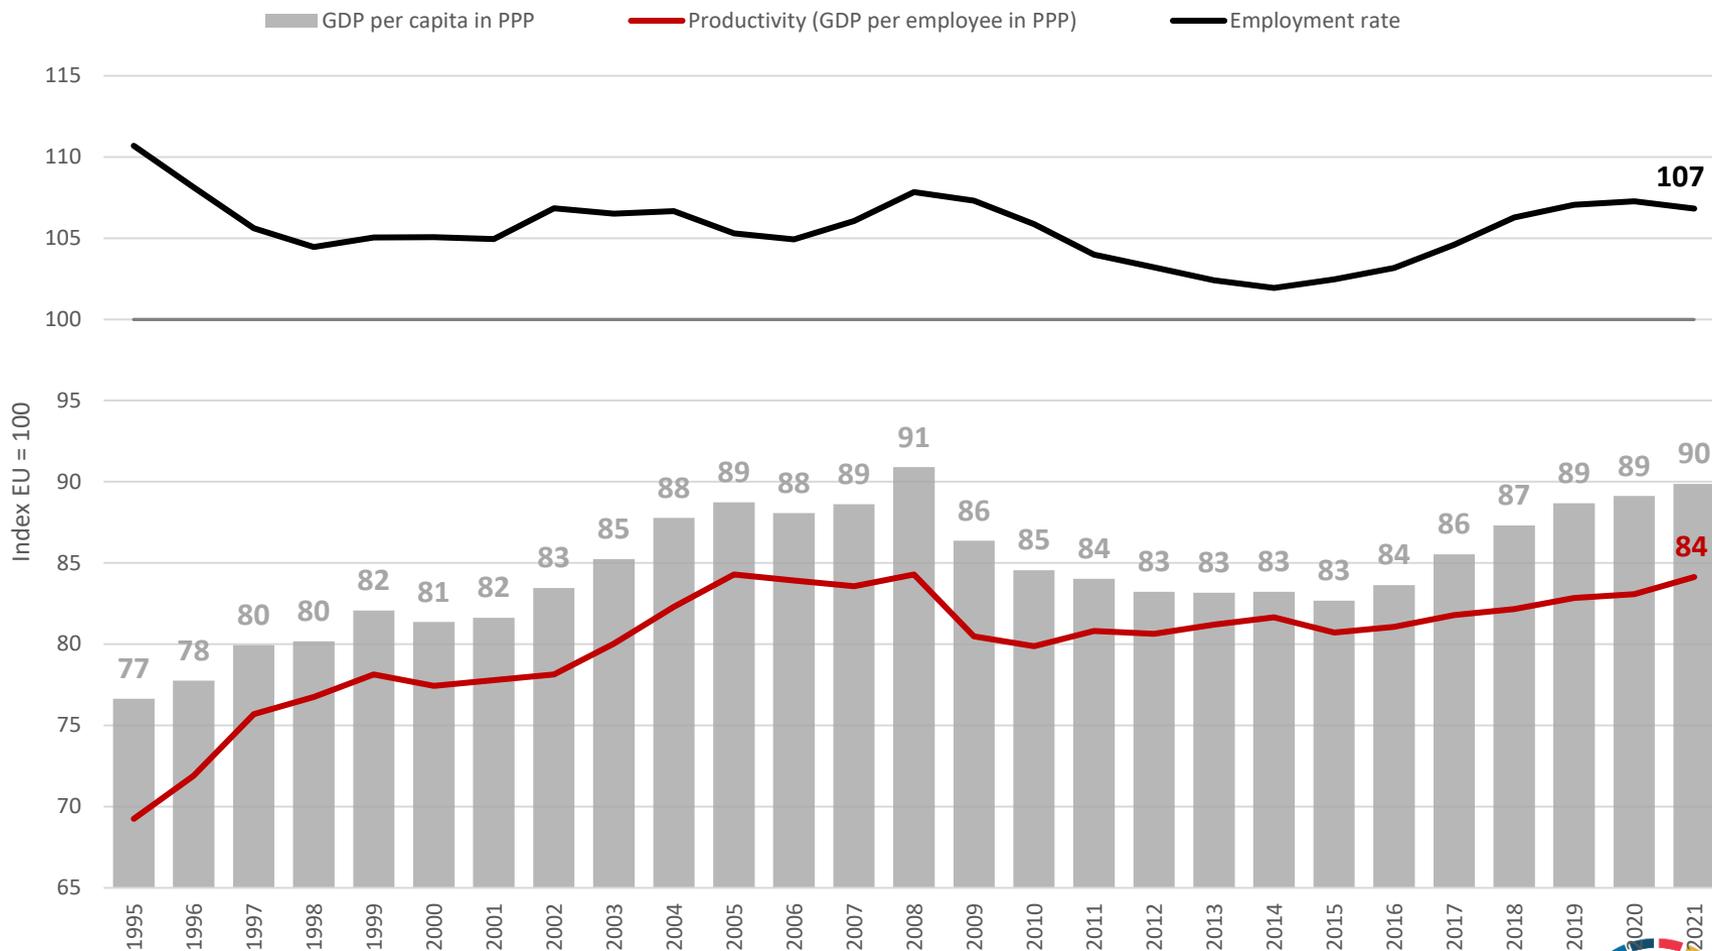

Data source: SURS (1990-2020); Eurostat (2025-2090).

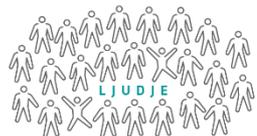

KAKOVOST ŽIVLJENJA ZA VSE

Low productivity of the Slovenian economy

Data source: Eurostat, MoF calculations.

KAKOVOST ŽIVLJENJA ZA VSE

New development strategy of Slovenia

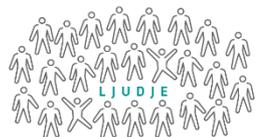

Why?

- Changed global conditions and Slovenia's different development starting point after the crisis.
- Expiration of the previous development strategy (2005 – 2013)
- The goal of the SMC – DeSUS – SD coalition agreement (2014 – 2018)

How?

- It was created in the coordination of SVRK, MoF and IMAD with the cooperation and relevant contents of all ministries.
- By connecting contents and horizontal coordination and moving away from silo operations and thinking.

KAKOVOST ŽIVLJENJA ZA VSE

The Development Strategy of Slovenia 2030 represents the country's **new overarching development framework.**

People in the center

At the level of the individual, a high-quality life manifests itself as:

1. in good opportunities for work, education and creativity,
2. decent, safe and active life,
3. healthy and clean environment
4. and involvement in democratic decision-making and co-management of society.
