

# Nauka o podacima i veštačka inteligencija

*Upotreba nauke o podacima u cilju  
boljeg upravljanja trezorom,  
organizacionim performansama i  
procesom donošenja odluka*

**PEMPAL ZAJEDNICA PRAKSE ZA TREZOR**

25. april 2024.

# Agenda

- Kratak uvod o Multidonatorskom fondu za podršku upravljanju javnim finansijama (PFM MDTF)
- Procena spremnosti analize podataka (DARA)
- Primena nauke o podacima pri Generalnom direktoratu za rezor – MF Indonezije

## VIZIJA

Bolja naplata, pametnija potrošnja

- Multidonatorski fond za podršku upravljanju javnim finansijama (PFM MDTF)

## RAZVOJNI CILJ

Podrška Vladi Indonezije u unapređenju politika i upravljanja prihodima i rashodima na centralnom i pod-nacionalnim nivoima kroz veću fokusiranost na rezultate i odgovornost primenom, između ostalog, digitalne tehnologije i rodne jednakosti.

### PRIHODI

Politike i upravljanje

### RASHODI

Politike i upravljanje

### POD-NACIONALNI NIVO

Upravljanje javnim resursima

### ODGOVORNOST

za UIF

### DIGITALNE TEHNOLOGIJE

Osnove i platforme

### RODNA RAVNOPRAVNOST

Osnajivanje

# Procena spremnosti analize podataka (DARA) – Metodologija

There are 6 topics with 23 subtopics identified.

Opportunity Identification	Usage Evaluation Review	
Data Management Strategy	Data Quality Framework	Data Quality Assurance
Data Collection	Data Access & Sharing	
Organize Structured Data	Organize Unstructured Data	Data Analysis
Data Visualization	Reporting and Distribution	
Career and Learning Development	Workforce and Performance Management	
Community		
Planning Review	Physical Resources	Data Repository
Analytics Services	Visualization Tools	
Policies and Procedures	Leadership	Organizational Design

**01**

## Ponuda i potražnja analize podataka

Identifikovanje i procena konkretnе potražnje višeg rukovodstva i kvaliteta ponude analize podataka u cilju unapređenja procesa donošenja odluka

**02**

## Podaci i upravljanje podacima

Identifikovanje novih mogućnosti upotrebe postojećih podataka i prepoznavanje nedostataka za potrebe sadašnjeg i budućeg korišćenja

**03**

## Tehnike analize podataka

Identifikovanje i mapiranje tehnika koje operativni timovi trenutno koriste kao i nivo spremnosti

**04**

## Ljudi i kultura

Identifikovanje i izrada detaljne mape i profila zaposlenih koji izrađuju analize podataka

**05**

## Tehnologija

Identifikovanje postojeće infrastrukture (upotreba i mogući nedostaci) i ključnih problema u oblasti upravljanja podacima

**06**

## Organizacija i regulisanje

Identifikovanje mogućih organizacionih ograničenja i pokretača u oblasti analize podataka, kao i korišćenih neformalnih struktura

4

# DARA – podaci i upravljanje podacima: *pristup i razmena podataka*

## Key Points

3. Provides insights into the data quality aspect of the data management.
4. Potential issues with data privacy and data sharing constraints, among others.
5. Identifies which data points must be shared to develop specific data analytics use cases.

## Subtopic Definition

The procedures and guidelines governing the solicitation, authorization, and monitoring of data access from primary and secondary information systems.

### Readiness Levels

#### Initial

#### Level 1

Data access and sharing of data are severely limited, and there are no well-defined processes for data access.

#### Managed Level 2

Data access and sharing, spanning internal and external stakeholders, are granted on an ad hoc basis, or the processes and policies governing data access and sharing are inconsistently enforced.

#### Defined Level 3

There is a formalized procedure for requesting data access and sharing, governed by a comprehensive data access policy that applies to both internal organizations and external parties.

#### Quantitatively Managed Level 4

Data access and sharing are broadly outlined for both internal organizations and external parties, with continuous monitoring conducted to address security concerns.

#### Optimizing Level 5

Regular reviews are conducted to balance accessibility with security, ensuring that data access and sharing are maximized while safeguarding critical information.

### Indicator

1. There is no grant for data access and data sharing process inside or outside the organization.

1. There is an access permission change history report without an E-mail/other requests document for data access and data sharing to show request access is inconsistent.

1. There are policies, SOPs, and standards in requests for data access and data sharing (policy and SOP document, filled request form).
2. Web portal (screenshot) or SOP document of data access and data sharing requests in a standardized channel/portal.

1. SOP document or IAM platform (screenshot) with a defined access role to show access and sharing granted systematically.
2. There is a monitoring report for data access and data sharing security.

1. Data access & sharing schedule review report showing data is as accessible as possible while securing critical information.

### General Explanation of The Levels

Readiness not addressed

Readiness addressed in an ad-hoc manner

Readiness normally addressed with standardized documentation

Readiness consistently addressed and governed

Readiness reviewed regularly to enable continuous improvement
