Performance Based Module

- enabled administrations to enter their vision, mission, strategic goals and objectives included in strategic plans of their budgets, and also to set the cost of performance objectives of administrations and units as well as relevant activity-projects.
- provided a central integrity by automatically generating the tables demanded in Guide.

Salary – Burden Calculation Module

- Draft pieces of legislation concerning public personnel rights are examined by Ministry of Finance and, their burden on budget is calculated.
- Information and data to be used in calculation are provided in electronic media,

Salary – Burden Calculation Module

- Unnecessary works and transactions are avoided and thus, time and efforts are saved,
- Relevant institutions benefit from required data, and it is targeted in the future to develop appropriation and budget fiche automatically by using these data.

Cadre Module

- Enables monitoring the cadres of the institutions.
- Changes in cadres
- Generating statistics regarding cadres
- Reporting information on cadres

Reporting

- User-oriented reporting approach
- Excel Add-in
- Reporting Tools
- Olap cubes

Help Desk

- over 11.000 users
- sharing information by forums,
- support with email
- active help video
- support with phone

Interaction with other systems

- web service
- data transfer with Xml
- online interaction with General Directorate of Public Accounts
- interaction with Office software

Future Targets

- developing user-oriented reporting approach,
- enhancing the cooperation and sharing information with other systems ,
- supporting performance budget structure,
- explicating budget scenarios.
- developing Multi language support

Firsts in the public budget

- Budget preparation, budget proposals and other information / documents of public administrations were transmitted directly.
- Public administrations are fully integrated with the e-budget system with all phases of budget preparation.

Firsts in the public budget

- All of the processes of Budget implementation, budget transactions and preparation of final accounts was made by using the e-budget system.
- Under the phase of Plan and Budget Commission of Parliament was directly connected to e-budget system and the first time, the main issue of the Official Gazette of the 2004 Budget Law were prepared by the e-budget system.

Firsts in the public budget

- Considerable time and resources were saved by enabling online transfer of appropriation dispatch documents to General Directorate of Public Accounts.
- Repeated data entry was avoided by receiving data that public administrations generate in their own system via electronic media.

Firsts in the public budget

- Entry and processing of data were facilitated.
- Users were given initiative for using budgetary data.
- Administrations were provided with flexibility for data entry and reporting from entry of budget proposal to publishing budget law.
